

RICOH Smart Integration

Connectors

Scan directly to cloud accounts — in the right format

Your Ricoh copier can do a whole lot more than copy. It can help you improve productivity by automating common and time-consuming document tasks. RICOH Smart Integration Connectors simplifies scanning to email as well as directly to cloud accounts — including Box™, Dropbox™, Google Drive™, OneDrive® for Business, SharePoint®, RICOH Content Manager, DocuWare®, eFax and more. You can also enable printing from your tablet or smartphone and allow guests to print with ease.

Now you can quickly upload your documents to your favorite cloud account in the right format and with the right file name, helping get the most from your multifunction printer (MFP) — no need for new hardware, software or infrastructure.

It's easy to get started: just add RICOH Smart Integration Connectors to your RICOH MFP, and you'll be working smarter within minutes.

Why Smart Integration Connectors?

- Simplifies the process of scanning a document to your email in editable formats — with logical subject and file naming
- Improves productivity by automating mundane manual tasks and multi-step processes typical of storing documents to a cloud account
- Provides a powerful mobile print / guest print solution
- It's affordable — no new hardware, servers, IT support or maintenance required
- It's easy to get started — your Ricoh multifunction printer is already capable of doing all of this, and more

Smart Integration Connectors

Scan to email and cloud accounts

Smart Integration Connectors provides direct scanning to cloud accounts and simplified scanning to email with no network setup. Scan files from your multifunction printer to any supported cloud account (including: Box™, Dropbox™, Google Drive™, OneDrive® for Business, SharePoint®, RICOH Content Manager, DocuWare®, eFax and more). While your multifunction printer is busy doing all of this for you, you can focus on work that adds value to your business.

Convert documents to editable formats

Once you scan a document, it often needs to be converted to an editable or searchable format so that it's usable. Smart Integration Connectors takes care of this for you by converting the data in hardcopy documents to usable formats with optical character recognition (OCR) and delivering your document with logical file naming.

Print from your tablet or smartphone

Printing from a tablet or smartphone should be easy for you and your guests — and now it is. With Smart Integration Connectors, you get simple, efficient, secured mobile printing — with no need for complex print drivers or infrastructure. Protect your confidential information with secured document release, which requires a print release code to be entered before your document is printed.

Get more from your MFP

Smart Integration Connectors is the perfect pairing for RICOH Intelligent MFPs. Capabilities are delivered via the cloud, so it's easy and affordable to get started. There's no capital expenditure, onsite servers or special software to implement.

Optional add-ons

RICOH Smart Integration solutions can expand to fit your unique needs. If your industry or business processes require additional functionality or features, our optional Smart Integration add-ons have you covered:

Device Enhancement add-on

Help protect document privacy with device-level authentication (including card authentication). Send documents to a secured print queue and release from any device in the group when ready. View device counters and stay on top of toner replacements with device management tools. Understand how devices are being used with utilization reporting features.

Healthcare add-on

Reduce manual data entry errors and improve staff productivity. Automatically create a new DrChrono patient record by scanning a driver's license. Add consent forms, referrals and other documents to a patient's EHR record in a single step — no need to scan to a PC, save and upload in multiple steps.

Legal add-on

Improve law firm productivity by automating mundane manual tasks. Easily prepare documents for court e-filing in the appropriate file formats and sizes. Automatically give scanned documents unique identifiers with Bates Stamping — just set the starting number.

RICOH
